Section A

Indian Academy of Sciences

Activities – a profile

1. **Publication of Scientific Journals:** Among the activities undertaken by the Academy since 1934, publication of scientific journals has occupied pride of place. Some early decisions were that papers for publication need not be communicated by Fellows, and that all papers submitted would be subject to scrutiny by referees.

The first issue of the *Proceedings of the Indian Academy of Sciences* appeared in July 1934. *Proceedings* was started as a monthly and soon became two monthlies in July 1935, one section devoted to physical sciences and the other to life sciences. In 1973, a new physics journal entitled *Pramana – Journal of Physics* was added. 1977 onwards, the publications programme was considerably enlarged, with the two sections of *Proceedings* split into several theme journals devoted to mathematics, chemistry, earth and planetary sciences, plant sciences, animal sciences, experimental biology and engineering. The section on experimental biology was renamed *Journal of Biosciences* in 1979, and in 1991, *Proceedings Animal Sciences* and *Proceedings Plant Sciences* merged with it. The section on engineering sciences was renamed *Sadhana* in 1984. New journals in materials science and astrophysics & astronomy were added. In 1985, the Academy took over and revived the *Journal of Genetics*, one of the oldest journals in genetics in the English language. The journal *Resonance*, added in the year 1996, is aimed at improving the quality of science education and teaching. The latest addition to the list of journals are ‘Dialogue: Science, Scientists, and Society’ and ‘IASc Conference Series’. These journals are online only journals.

The Current Science Association works with the Academy in bringing out the fortnightly multidisciplinary journal *Current Science*, published since 1932.

The number of journals currently published by the Academy is 13, covering all major disciplines in science & technology. The Academy is one of the biggest scientific journal publishers in the country. Besides regular journals, special publications of topical interest and *Patrika* – the newsletter of the Academy – are frequently brought out.

Since January 2007, 10 journals of the Academy are being co-published with Springer (<http://www.springer.com>). Springer provides access to the journals' content worldwide on its journal platform Springer Link (<http://link.springer.com>). Springer also distributes

print editions of the 10 journals outside India, all international subscription queries can be made to subscriptions@springer.com. During the term of co-publishing, Fellows and Associates will have full complimentary online access to the Springerlink content of 10 journals of the Academy (which is password enabled) on the Springer link (<http://link.springer.com>) which is hosted on the Academy Fellowship webpage. Full and free access to the Academy journals is available worldwide on the website of the Academy (<https://www.ias.ac.in/Journals/Overview/>).

2. **Election of Fellows and Honorary Fellows:** The Academy annually elects distinguished scientists of the country to its Fellowship; it also elects persons distinguished for contributions to science or engineering, whose place of work is outside India, as Honorary Fellows. The stringent annual exercise begins with nominations by Fellows, and goes through evaluation and shortlisting by Sectional Committees for the Council, and ends with ballot open to all Fellows in December every year. As on 31 December 2020, the number of Fellows on roll was 1078, and Honorary Fellows 47.
3. **Selection of Associates:** The Associateship programme was introduced in 1983 to identify and encourage promising young scientists working in India. The Associateship is tenable for a minimum period of 3 years or a maximum period of 6 years. This expanded tenure of Associateship is applicable for candidates selected from the year 2019 onwards.

Fellows of the Academy (except members of the Council, Sectional Committees) and other Heads of institutions of national importance such as IITs, NITs, IISERs, CSIR laboratories, University departments (limited to pure and applied sciences including engineering) are eligible to nominate. A nomination remains valid only for the year of nomination. Nominations are solicited up to April 30, 2021. Please refer to page no. 298 for more details.

4. **Organizing Scientific Meetings:** The Academy annually holds scientific meetings, symposia and public lectures and encourages other similar activities to provide means of exchange of scientific knowledge among scientists and to bring new knowledge to the attention of the whole scientific community. Of the Academy's two annual meetings, the Mid-Year Meeting takes place in June and the Annual Meeting in November. Please see page 364 for dates and venues of these meetings. Fellows and Associates of the Academy, invited college and university teachers and other invitees participate in these meetings.

5. Repository of Publications of Fellows: This initiative is intended to make available research and review papers published by Fellows in peer-reviewed journals. At the end of January 2021, the repository had 1,06,359 records with metadata, and around 22,685 of them with a fulltext PDF file.

6. Chair Professorships:

- (i) **Raman Chair:** The Raman Chair was instituted in 1972 by the Government of India to commemorate the founder of the Academy, Sir C. V. Raman. Eminent scientists are invited to occupy the Chair, for periods between six weeks and six months.
- (ii) **Jubilee Professor:** The Jubilee Professorship was instituted during the Platinum Jubilee Year of the Academy in 2009. Eminent scientists from any country and from any scientific discipline are invited to occupy the Jubilee Professorship for a period of two weeks to one month.
- (iii) **Janaki Ammal Chair:** The Academy instituted the Janaki Ammal Chair in the year 2017 based on the suggestion evolved during the Platinum Jubilee Celebration of the Academy to establish a Chair for Women Scientists in honour of Dr Ammal. Guidelines of Raman Chair Professorship of the Academy are applicable for regulation of this Chair.
- (iv) **The Academy–Springer Nature Chair:** The Academy–Springer Nature Chair was established in 2017 (initially for two years) to commemorate ten years of the co-publishing arrangement between the Academy and Springer Nature and is implemented by the Academy Trust (tAcT). The Chair Professorship will bring an eminent international scientist working in the area of sustainability to lecture at research-intensive institutions in India and the neighboring countries, as well as to deliver public lectures to address a wider audience.

7. Science Academies' Education Programme: Besides publication of the science education monthly – Resonance, six main activities are implemented towards attempts to improve the state of higher education and teaching of science in the country. They are (a) Participation of college and university teachers in Academy annual meetings, (b) Summer Research Fellowships to students and teachers, (c) Focus Area Science Technology Summer Fellowships to students and teachers targetted at specific geographical regions/specific topics, (d) Summer schools for students and

teachers on specific topics (e) Refresher courses for teachers, (f) Lecture workshops for students and teachers. The Indian National Science Academy, New Delhi, and the National Academy of Sciences India, Prayagraj, have joined this Academy since April 2007 in implementing these programmes.

8. **Women in Science:** In January 2003 the Council of the Academy constituted a committee to address issues concerning women scientists. This led to the formation of the "Women in Science" Panel in January 2005, whose objective is to study the current status of Indian women scientists as well as the problems faced by them, and to recommend to the Council suitable remedial measures. Some of the major initiatives undertaken so far by the Panel include – (a) Role model programme: This initiative aims to organize national seminars aimed at inspiring and motivating young women to take up a career in science. (b) Lilavati's Daughters: The book Lilavati's Daughters: the women scientists of India, published by the Academy, is a collection of biographical and autobiographical essays of about 100 women scientists of India. (c) Discussion sessions on Women in Science and "Leaky pipeline": A survey on trained scientific women power, How much are we losing and why? The WiS Panel undertook this study to identify factors involved in the choices made by women to choose careers outside science and to address the relevant issues.
9. **Oral History Archive:** The archive is intended to be a repository of audio and video documentaries of some of the leading scientists of the country from among Academy's fellowship. It is hoped that the documented glimpses of experiences and careers of eminent personalities, while being a historical record, will also be of inspirational value to new generations of students and scientists. To start with, video memoirs on five past presidents of the Academy have been produced.

Associateship

THE ASSOCIATESHIP PROGRAMME

Introduction: This programme was introduced in 1983 to identify and encourage promising young scientists. The programme was assessed for its impact by a committee constituted by the Council in 2018. Based on the accepted recommendations of this committee, the programme was restructured to provide opportunity to young scientists from diverse institutions and backgrounds to pursue scientific excellence. As per the revised guidelines:

- (i) The upper age limit is now 38 years (certain conditions are applicable)
- (ii) The Associateship is tenable for a minimum period of 3 years or a maximum period of 6 years.
- (iii) The extended tenure of Associateship is applicable for candidates selected from 2019 onwards.
- (iv) Associates are expected to contribute to the Academy's activities, namely:
 - a. Associates will be encouraged to attend meetings of the Academy.
 - b. Organize Lecture Workshops, Refresher Courses and mentor students/teachers selected under the Summer Research Fellowship Programme.
 - c. Help in publications of the Academy as authors and participate in editorial activities of the Academy journals.

Who can nominate/propose:

- (a) Fellows of the Academy can nominate. Current members of the Sectional Committees and Council Members are not entitled to serve as proposers.
- (b) With a view of expanding the scope of the Associateship programme starting from 2017, nominations are being solicited from the Heads of institutions of national importance such as IITs, NITs, IISERs, CSIR laboratories, Central University departments (limited to pure and applied sciences including engineering).

For the year 2021 the last date of receipt of nominations is 30 April. Duly filled in nomination forms are to be uploaded in the link circulated to the Fellowship.

Eligibility for Nomination and Age Limit: Nomination is open to a researcher holding a PhD, working in an institution in India. For the year 2021 candidates born after 31.12.1983 (i.e. up to 38 years of age) are considered. However, it is strongly recommended that candidates below 35 years only are nominated (i.e. candidates born after 31/12/1986 for Associateship starting in 2021). Candidates between 35 and 38 years of age should be nominated only in unusual

circumstances (e.g. representing weaker sections, those working against odds or in less endowed research institutions or in fields such as medicine where researchers take longer to establish the career), but have the potential to be outstanding scientists. Nominators may justify this in the space provided in the nomination form. An age limit of 35 will generally apply to candidates from well endowed institutions. It may be noted that a researcher who normally works in an institution in India, but is on a short-term academic visit to an institution abroad may be nominated. However, if such a nominee is selected as an Associate, the Associateship shall become operational after she/he returns to India, the date of which should be within six months of declaration of the selection results normally during July. If a selected Associate does not return to India within six months of declaration of the selection results, the Associateship will automatically be cancelled. The total period of Associateship will, however, be counted from the date of declaration of the selection results. The total number of Associates is limited to 100 (present strength is 75).

The nomination should include:

- (1) Nomination form with original signature.
- (2) Summary of the scientific contributions.
- (3) Nominee's biodata and a complete list of publications
- (4) Reprints of the five most important papers published by the nominee in his/her independent career.

The validity of a nomination is one year.

How is an Associate selected: Quality of work is the sole criteria for selection with emphasis on the proven record of independent research work (this may include work conducted prior to securing a formal independent position and high quality work done abroad). In this connection, the selection committee may, if deemed necessary, seek letters from senior authors of the nominee's publications to judge the extent of independent contributions by the candidate. It would be ideal to consider PhD plus 10 years as the duration to establish independent research, which includes the period spent on post-doctoral research and that as an independent researcher at an institution.

For the purpose of selection, candidates with INSPIRE Faculty Fellowships, Ramanujan Fellowships and other similar Fellowships will be considered to have started their independent research from the beginning of their tenure in the corresponding Fellowship. Candidates representing weaker sections will be evaluated based on their perceived potential and motivation to be independent researchers. Attempts should be made to be inclusive and achieve representation from diverse backgrounds, gender and areas of work.

The evaluation process: Nominations are solicited in 6 subject categories:

Mathematics, (b) Physics, (c) Chemistry, (d) Earth & Planetary Sciences, (e) Engineering & Technology, and (f) Life Sciences. All valid nominations are evaluated by a joint committee of (i) the Convener of the Sectional Committee in that subject category and (ii) a member of the Council representing the subject. They will jointly make recommendations to the President of Academy. The candidates recommended by the joint committee will be considered by the President of the Academy and ratified in the Council.

While all Associates will have a guaranteed tenure of 3 years, each Associate will be evaluated at the end of two and half years for assessment of their contributions to the activities of Academy and their own scientific excellence. Based on the recommendations of the evaluation committee, an offer of renewal of Associateship may be made for another term of up to 3 years. Each year, about 33 Associates are selected (including those with a renewed 3-year term) to constitute the recommended total number of 100 Associates at any given time.
